ARRAY®

Solid Flatware Pre-Soak

Reorder No. 275954 / 2-6 lb.

Features

- Specially formulated compound
- Alkaline/surfactant blend
- Detarnishing capabilities

Benefits

- Removes tough soils from flatware
- Eliminates rewashes
- Improves silverware appearance

Recommended Uses

For presoaking silver and stainless flatware.

Specifications

- Blue color
- No scent added
- Opaque solid
- 9.5-11.0 pH use dilution
- Phosphorus 0.32%
- Low foam

Important

Read and understand the label and Safety Data Sheet (SDS). These provide a description of hazards, precautions, personal protective equipment, first aid, 24 Hour Emergency lines, storage data and other safe handling information. The SDS is available using the QR code on the label and is also available from the distributor.

Product Directions

Equipment to use:

Recommended dispensing equipment.

Directions for use:

This product should be dispensed only from equipment designed specifically to handle solid capsule detergents. Remove cap and place inverted capsule into bowl unit. Set the detergent timer to flush an adequate amount of water against block and flow into presoak tub/tray. For consistent feeding of product, it is suggested that cold or warm water is used to dissolve product. Typical usage is 2 to 3.5 ounces per 5 gallons of water. Fill the remainder of the soak pan with warm water. Place flatware into pan and allow soaking until soils have been loosened. For detarnishing, place a piece of aluminum foil to cover bottom surface of soaking tray. Rack flatware and rinse with water from sink to remove excess detergent, and then wash as usual in mechanical washer. For pots and pans that require extra soaking, direct detergent solution into sink and fill with warm to hot water. Place pots and pans into sink and allow soaking until the soils can be easily removed.
