Produce Wash

US Item Code 510304/ 2-2 Qt.
CA Item Code 1494154/2-1.89 L

Features
- Concentrated formula
- No-rinse formula
- High organic soil load tolerance

Benefits
- Economical in-use cost
- Does not alter taste or aroma of treated produce
- Solution may be used up to 8 hours

Recommended Uses
For use on fruits and vegetables processed by chopping, slicing, peeling, etc.

Specifications
- Colorless
- No added scent
- Liquid
- Very low foam
- < 2.0 pH use dilution
- Phosphorus 9.48%
- FDA approved

Important
Read and understand the label and Safety Data Sheet (SDS). These provide a description of hazards, precautions, personal protective equipment, first aid, 24 Hour Emergency lines, storage data and other safe handling information. The SDS is available using the QR code on the label and is also available from the distributor.

Product Directions
Equipment to use:
Soak Sink or Faucet Rinse application

Directions for use:
This product is designed to be used on fruit and vegetables processed by chopping, slicing, cutting, peeling, etc. Before processing, produce may be rinsed with potable water to remove gross soils. Not for use on raw agricultural commodities. This product dilutes at a rate of 1 oz. to 7.8 gallons / 1 ml/liter water automatically from the dispenser. No rinsing is required after use. To test for proper strength, place an appropriate "short range pH test paper" in a sample of solution as directed by the manufacturer's use instructions. Compare the test strip to the color indicator chart. If the pH is 3.5 or less, the solution will be effective.

Faucet Method:
1. Press the button on the dispenser and turn the button 90° clockwise to lock the button for continuous dispensing. 2. Rinse processed fruit and vegetables for 60 seconds under a continuous flow of proper strength of Produce Wash solution. 3. Scrub or agitate processed produce as necessary to remove visible soil.4. When finished, turn the dispenser button 90° counter-clockwise and release the button to turn off the dispenser.

Soak Tank Method:
1. Fill soak tank to the desired level using the dispenser. To activate the dispenser, press the button on the dispenser and turn the button 90° clockwise to lock the button, or hold the button while the sink fills. When finished, either release the button or turn the dispenser button 90° counter-clockwise and release the button to turn off the dispenser. 2. Submerge prepared produce for a minimum of 60 seconds. 3. Scrub or agitate processed produce as necessary to remove visible soil. 4. Drain and refill soak tank with fresh solution at least every 8 hours or when soil becomes excessive. Periodically check pH using pH paper and if the pH rises above 3.5, the solution must be changed.

Array Produce Wash efficacy combats the strains of bacteria most commonly found to be the highest risk factors leading to foodborne illness and cross-contamination. (including; Micrococcus luteus, Escherichia coli, Pseudomonas aeruginosa, Staphylococcus aerogenies, Bacillus cerius, Salmonella typhimurium). A uniquely designed formulation that maintains superior bacterial effectiveness when used over and over. Use for up to 8 hours before solution re-charge may be necessary.
