Important

Read and understand the label and Safety Data Sheet (SDS). These provide a description of hazards, precautions, personal protective equipment, first aid, 24 Hour Emergency lines, storage data and other safe handling information. The SDS is provided with each container shipped, it is also available from the distributor.

Product Directions

Equipment to use:

Pail and mop wringer, deck brush, mop.

Directions for use:

Floor Cleaning – Use daily to clean the floor. 1. Wipe up spills and sweep debris from floor surface. 2. Dispense product at a ratio of 1 ounce per gallon of cold or hot water (8 mL per liter). 3. Apply solution to floor surface using a dripping wet mop. 4. Aggressively scrub the floor with a deck brush. 5. Mop up soiled solution or squeegee to drain. 6. Rinse or use damp mop to clean floor surface. 7. Dry floor surface using a dry mop or squeegee.

Traction Treatment – Use monthly or spot treat slippery areas as needed. 1. Wipe up spills and sweep debris from floor surface. 2. Apply product at full strength (straight from bottle) in area to be treated. 3. Evenly spread product across the surface using deck brush. Allow product to remain on floor surface: 20 minutes for quarry tile or 40 minutes for glazed and porcelain tile. DO NOT allow this product to dry on surface during standing time. 4. Mop up soiled solution or squeegee to drain. 5. Rinse or damp mop floor to clean floor surface. 6. Dry floor surface using a dry mop or squeegee.

Concrete Cleaning – Use on sidewalks or dumpsters. 1. Sweep all debris from area to be cleaned. 2. Dispense product at a ratio of 1 ounce per 4 ounces of cold or hot water (250 mL per liter). 3. Apply solution and allow it to stand on area to be cleaned for 3-5 minutes. 4. Aggressively scrub area with a deck brush. 5. Rinse or use damp mop to clean floor surface.

Note: Floors will be slippery when wet or contaminated with foreign materials. Promptly clean up spills and foreign materials.
